

Geomatica

AUTOMATION. PERFORMANCE. INNOVATION.

Geomatica For Education

PCI Geomatics is dedicated to promoting GIS technology and advancing technical research in colleges and universities. We believe professional grade software is a key ingredient in helping your students visualize research and analyze geographic information. PCI's educational software solutions make these image analysis and data visualization tools easily available to the academic world.

Our flagship software product, Geomatica, is used by scientists and geospatial professionals around the world to access, analyze, and share all types of data and imagery. Demonstrate to your students how important spatial analysis is to sound decision making by providing them today with the tools they will need tomorrow.

Geomatica Total Education Suite

Don't waste time deciphering which packages and modules your school may or may not require when the Geomatica Total Suite is all you need! It is a complete and comprehensive toolkit for Geomatics education and research.

The Geomatica Total Education Suite includes all a user needs to work with Geospatial data. It provides powerful tools designed for photogrammetry instruction or research on small and large production workloads to produce high-quality geospatial products.

Geomatica includes integrated tools designed for covering everything from the fundamentals of remote sensing to deep research on an endless number of subjects.

Your students deserve the most complete and comprehensive toolkit for geomatics education and research. Your school deserves Geomatica Total Education Suite.

TOP 3 REASONS TO BUY Geomatica TOTAL EDUCATION SUITE

Use What the Pros Use

Geomatica is the software of choice for scientists and image professionals across industries to access, analyze, and share all types of data and imagery.

A Complete Toolkit

The most comprehensive Geomatica suite available includes all of the tools necessary for image, correction, rigorous image analysis and data visualization.

Free Student Licenses

Purchasers of lab licenses will also receive individual student licenses for the duration of their studies FREE!

Educational Licensing Programs

Lab Licensing

Lab licensing is ideal for "Departmental" purchasers who are looking for a smaller group of licenses.

Purchase of lab licenses gives the user:

- Permanent license keycodes
- 1 to 30 user combinations
- 1 year of Full Support (2 designated contact persons)
- Temporary student licenses for the course duration

Site Licensing

Site licensing is designed for larger, institutional purchasers who are looking to equip an entire university (single or multiple campuses).

Site licenses include:

- 1-3 year license keycodes
- 100-pack bundles
- Full support for the duration of the contract (2 designated support persons)

Educational Alliance Program

The PCI Geomatics Education Alliance Program creates strong reciprocal relationships with its education customers by providing technical resources and a framework for information exchange.

We recognize that our education institutions continually use our software to support research in the geospatial domain, as well as develop methodologies and applications in a broad range of fields. We would like to hear about them - whether they are research or classroom related, we want to help promote our shared success stories.

We recognize that it's a challenge to develop course material to keep up with the fast-paced software industry. So to help you keep abreast of the newest and most exciting technological developments, the Education Alliance Program provides you with access to the latest PCI Geomatics training materials.

Free Student Licences!

Ensuring that students have the software they need is a challenge all schools face. That is why PCI Geomatics offers free student licensing to provide students with time-limited, personal copy of Geomatica for home use.

With Geomatica Student licensing, no student has to worry about finding the right software or spending late nights in the lab. Students' personal computers will have the same fully functioning Geomatica software they use in class. Students will appreciate the added convenience of being able to use Geomatica on their own PC or laptop, whether they are working in the classroom, at home, or the library.
